

Proposal:

Commons Economy Incubator

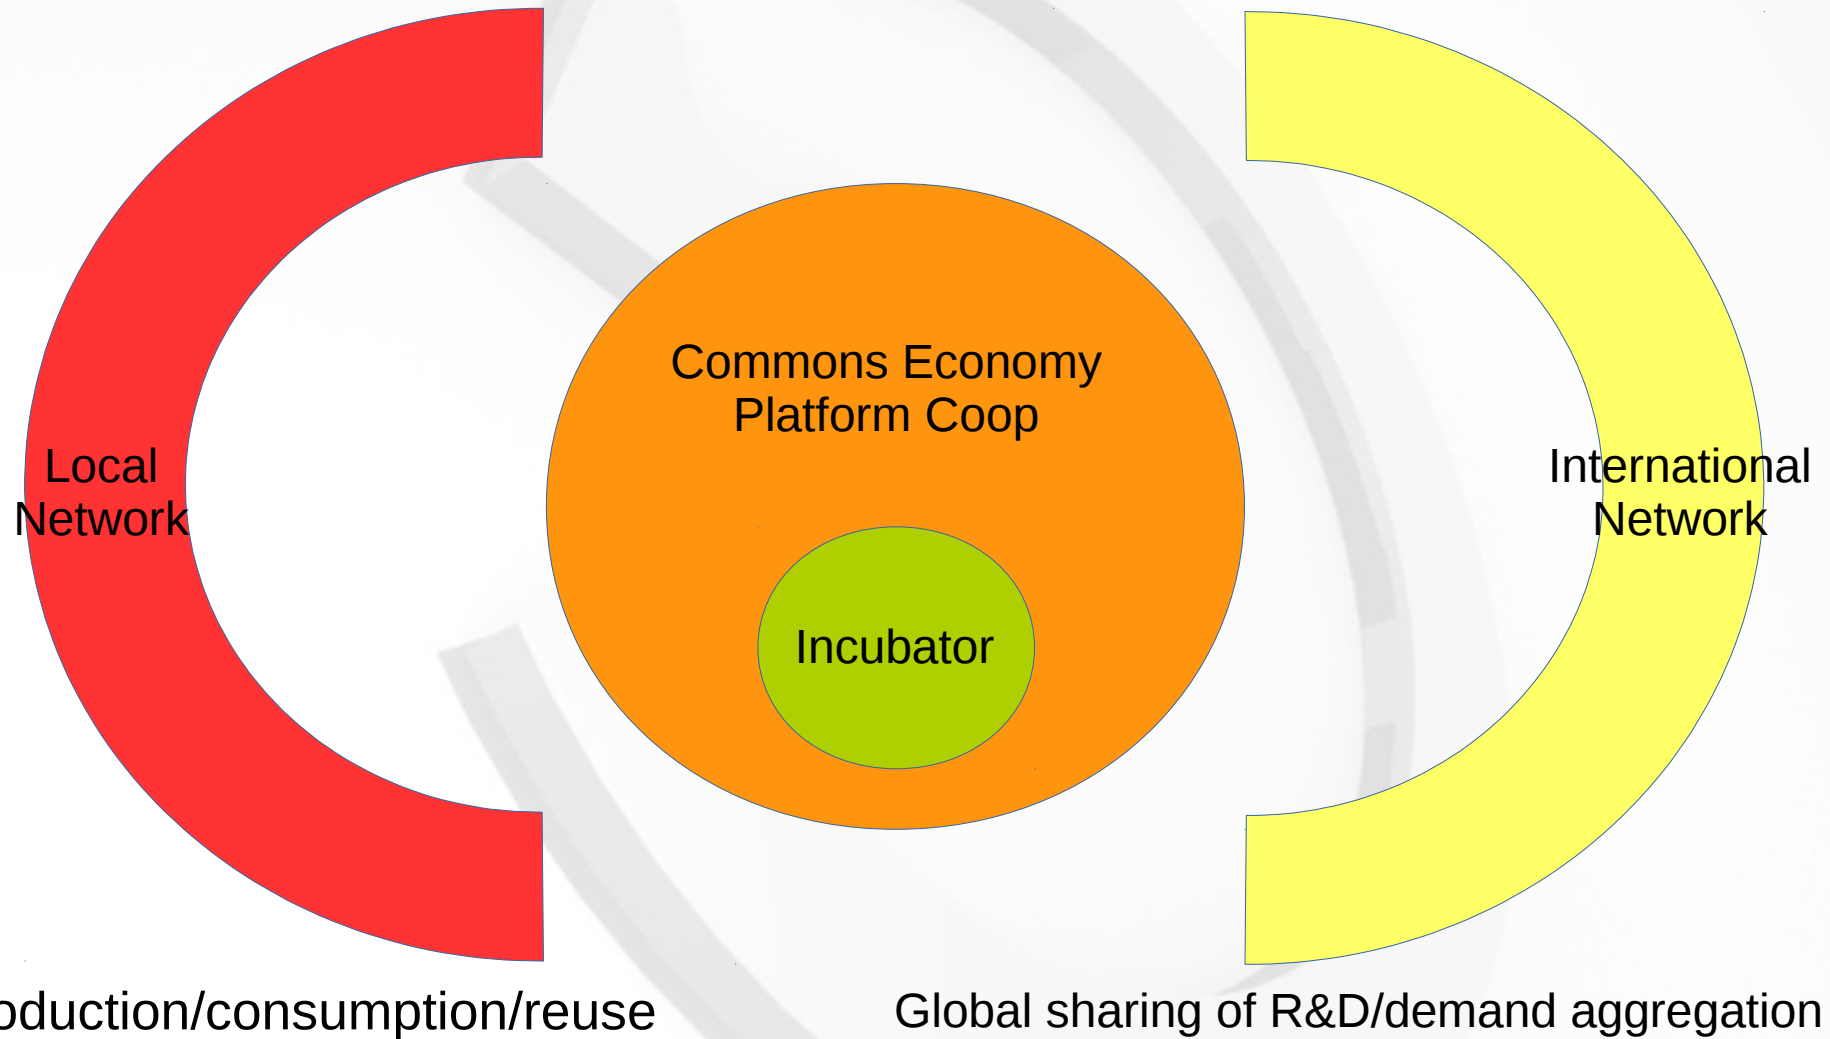

freeknowledgeinstitute

*2016 Wouter Tebbens/FKI
+ Various Contributors*

Global – Local network

Commons Economy Coop

- Projects can test out their MVP immediately through the Coop
- The Coop offers to groups the possibility to run their business inside as an independent business unit
- The Coop aims to embed projects in a dynamic ecosystem:
 - It is a local community of communities, of social innovators and commons-oriented actors
 - It forms part of an international network of likeminded and complementary actors
- The Coop combines an integral/holistic set of activities, from production to consumption, from renting to sharing and reuse
- The Coop as an experimental platform to apply different innovative collective management schemes

Commons Economy Incubator

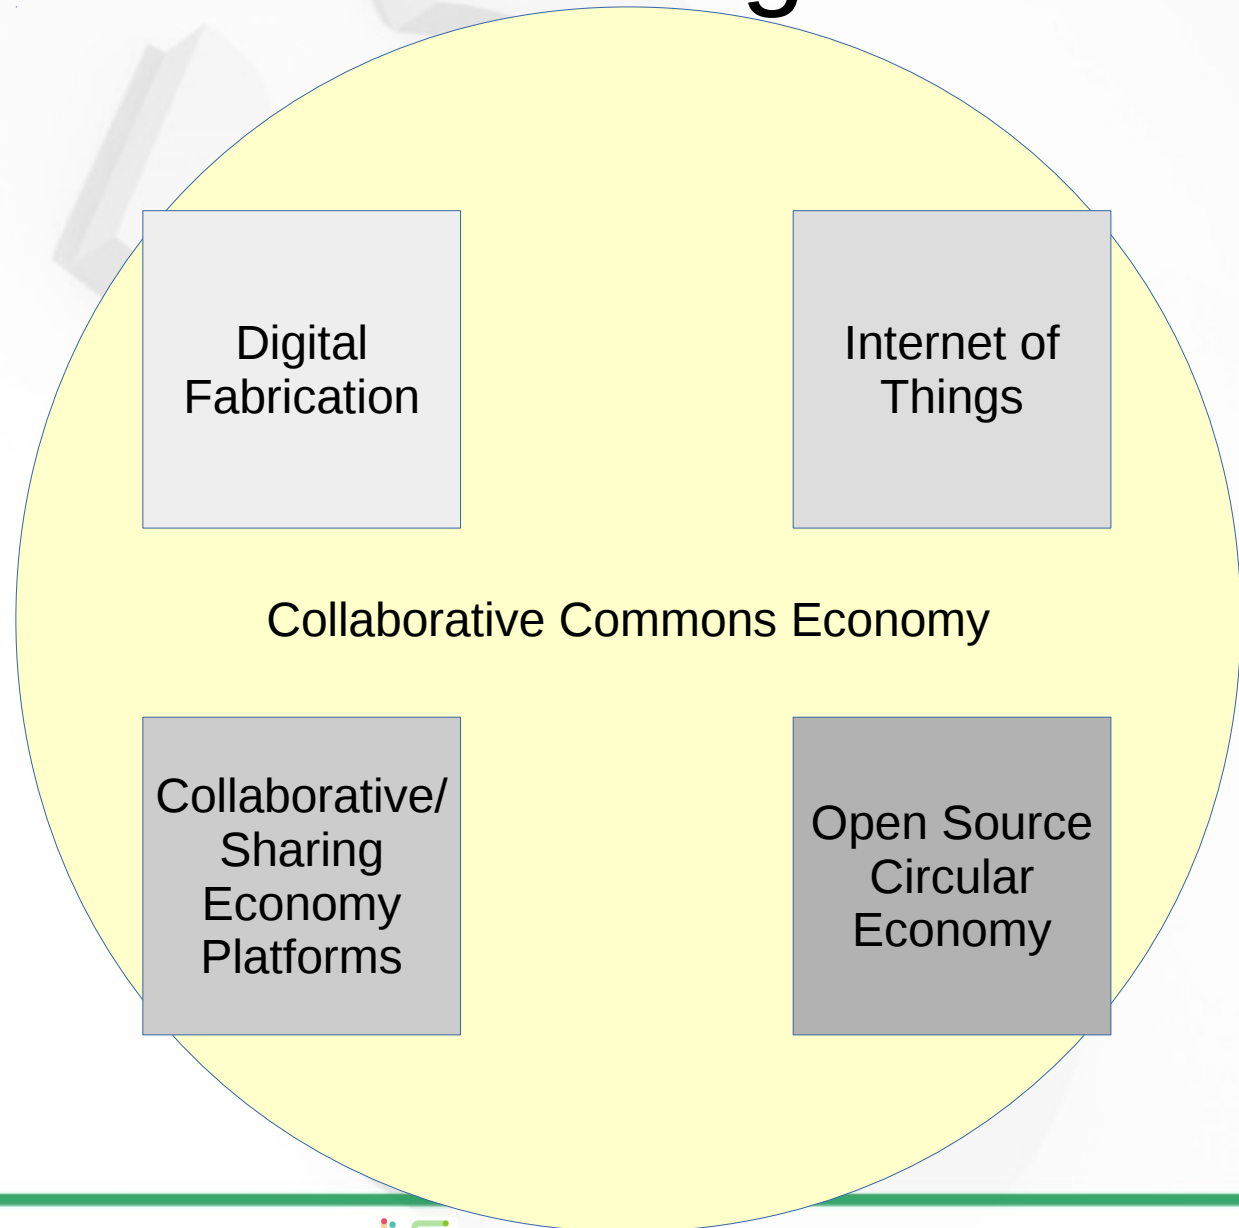

- Selection process: Commons Canvas + Compass
- Online & offline commons-oriented business courses
- Continuous Assessment Activities: the more commons-based patterns a business applies, the more support is offered
- A mentoring & connector programme to help people connect to the wider community and make their business successful

The Incubator's strategic focus

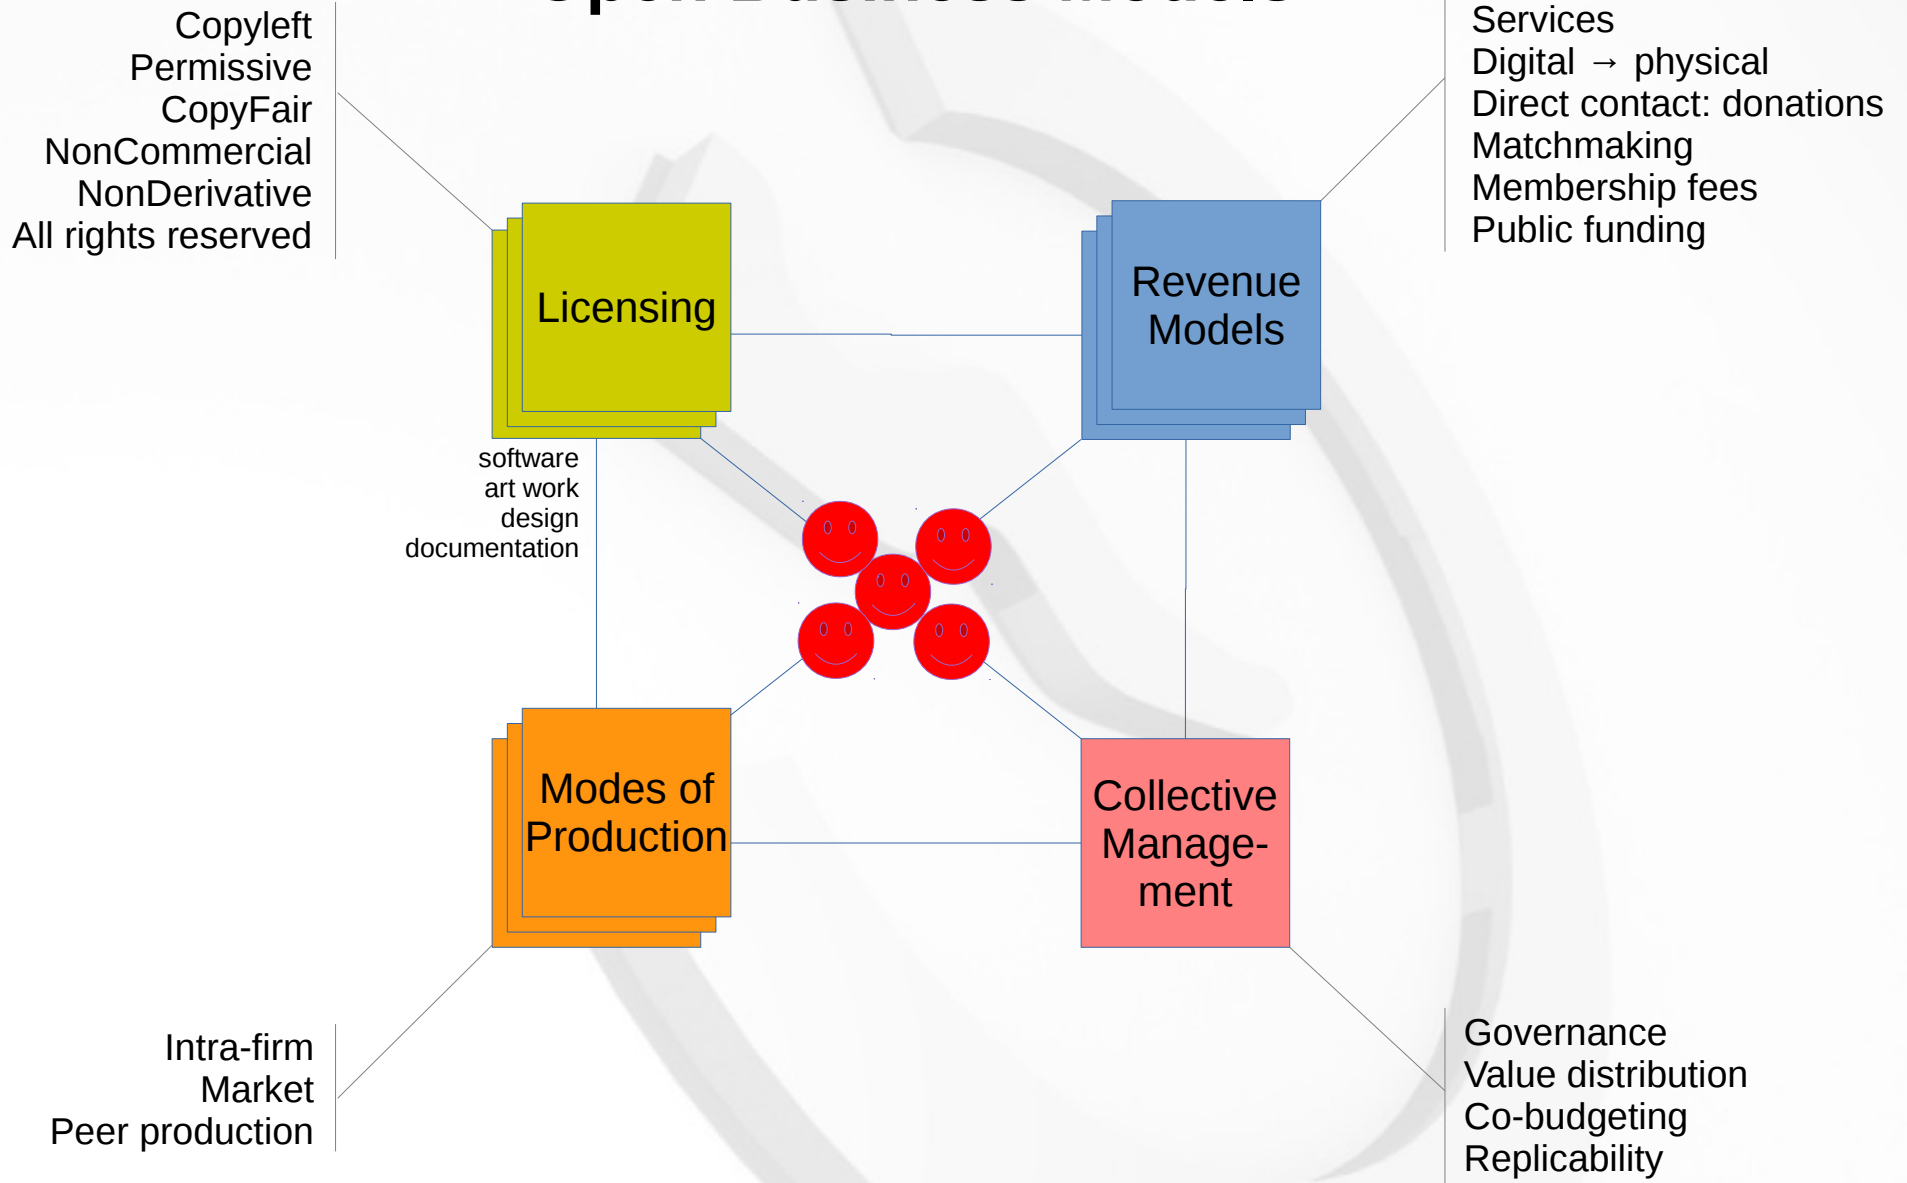

A possibly strategic selection could include:

Why this selection?

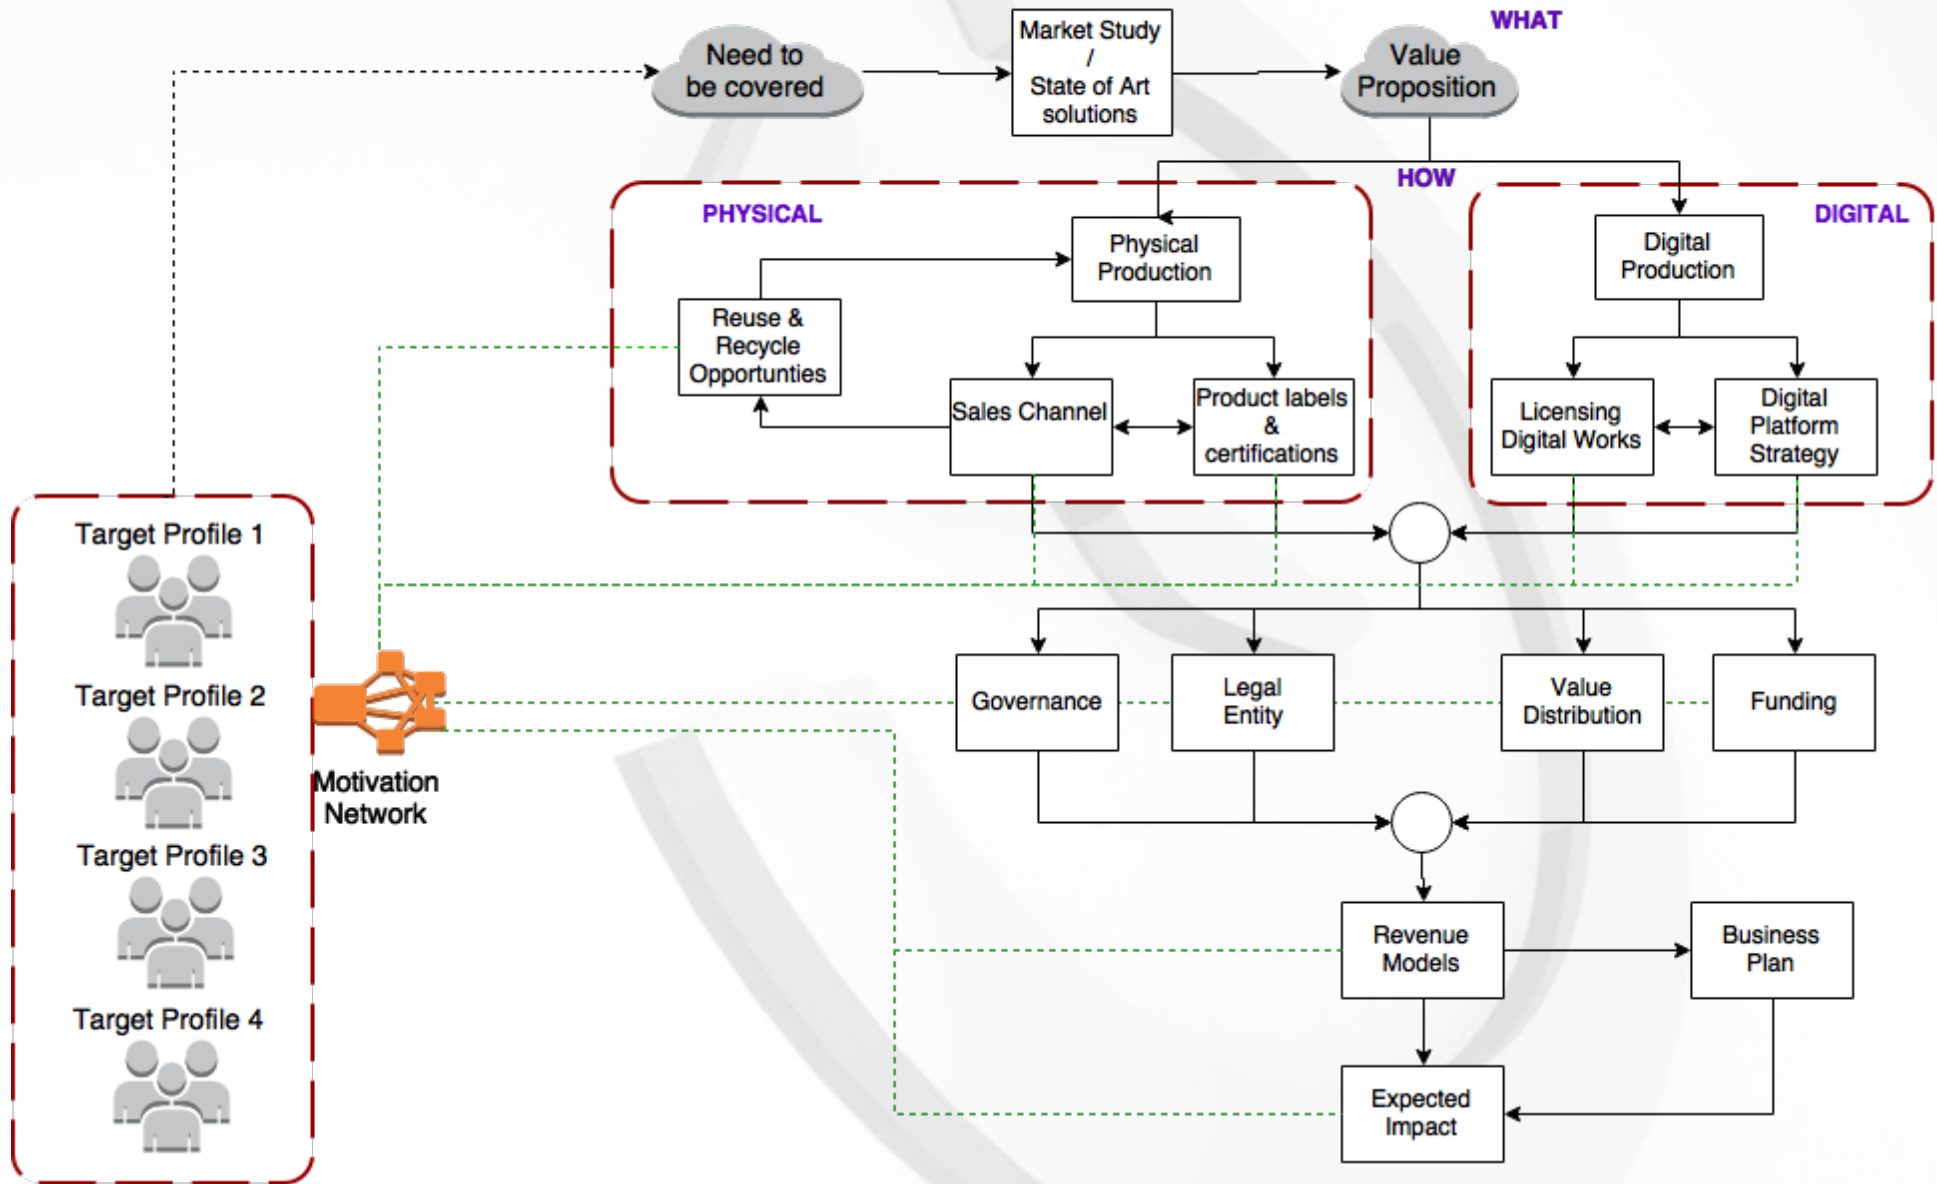

- Digital component
- Peer production
- Knowledge sharing → Replicable experiences
- Social need
- Transformative potential
- Economic opportunities
- Innovative models
- Local & global networks

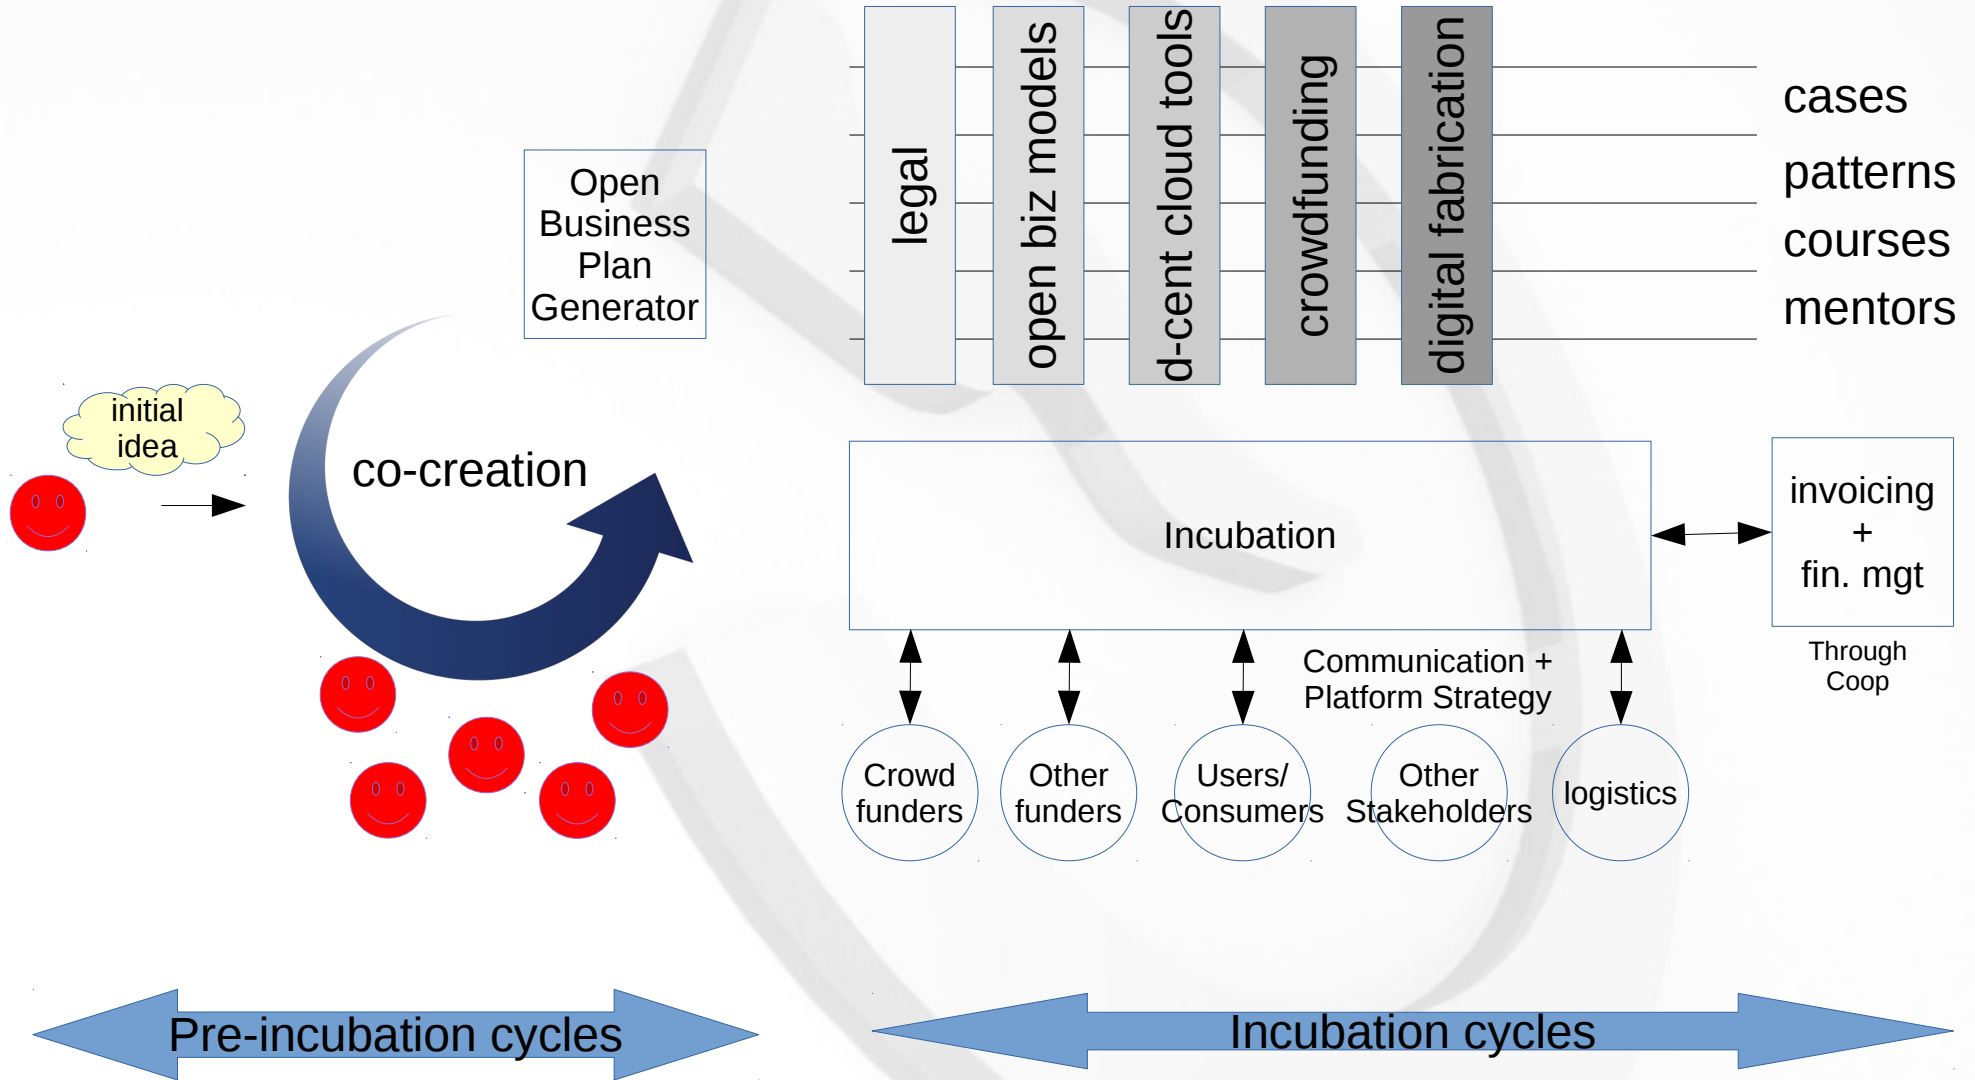

Open Business Models

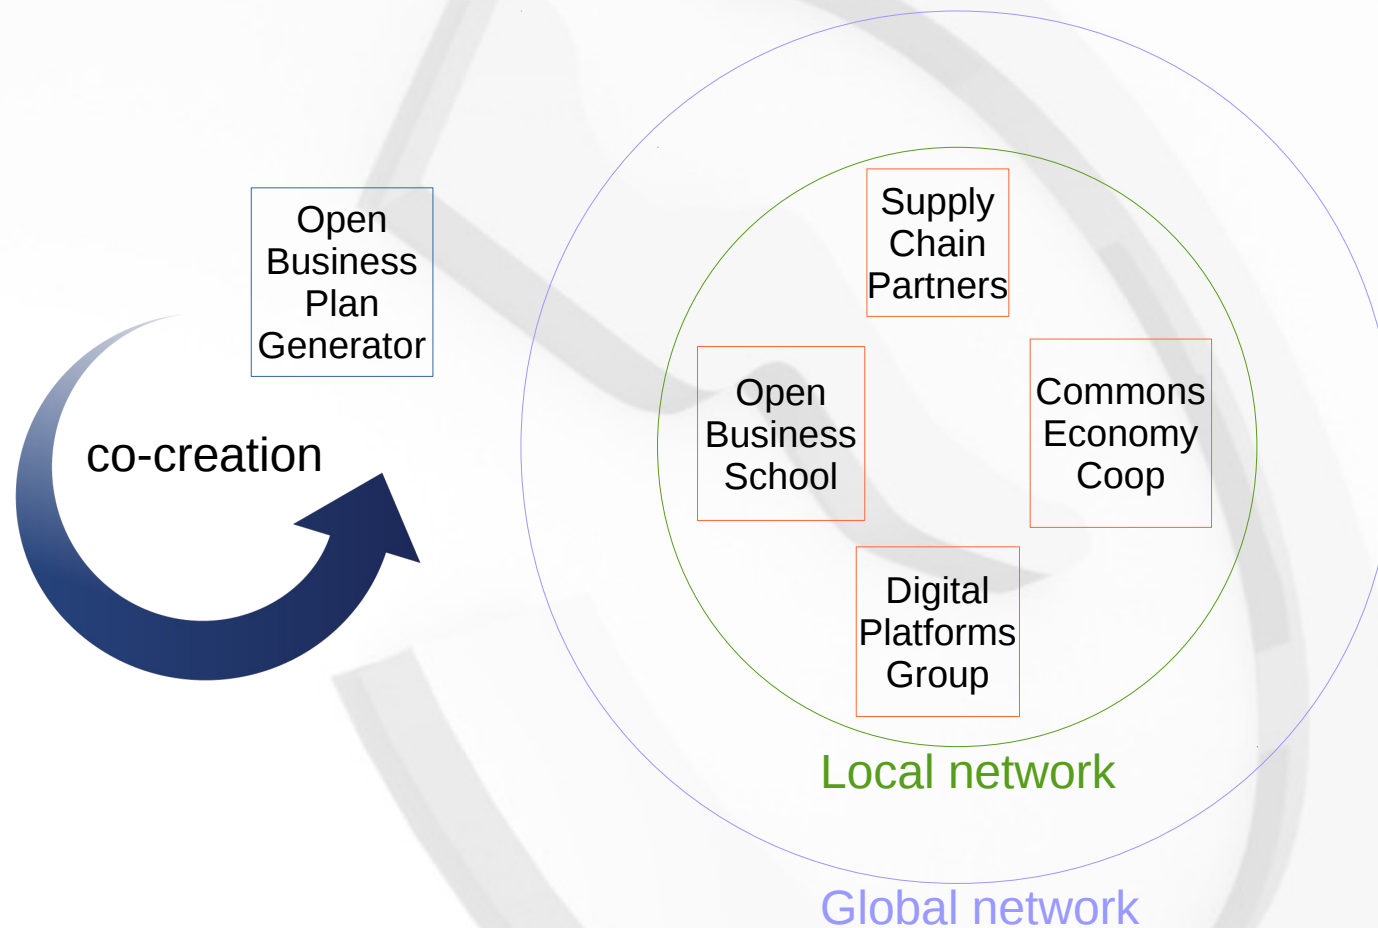

Open Business Plan Generator v0.1

Incubator Model v0.1

An ecosystem of incubation services

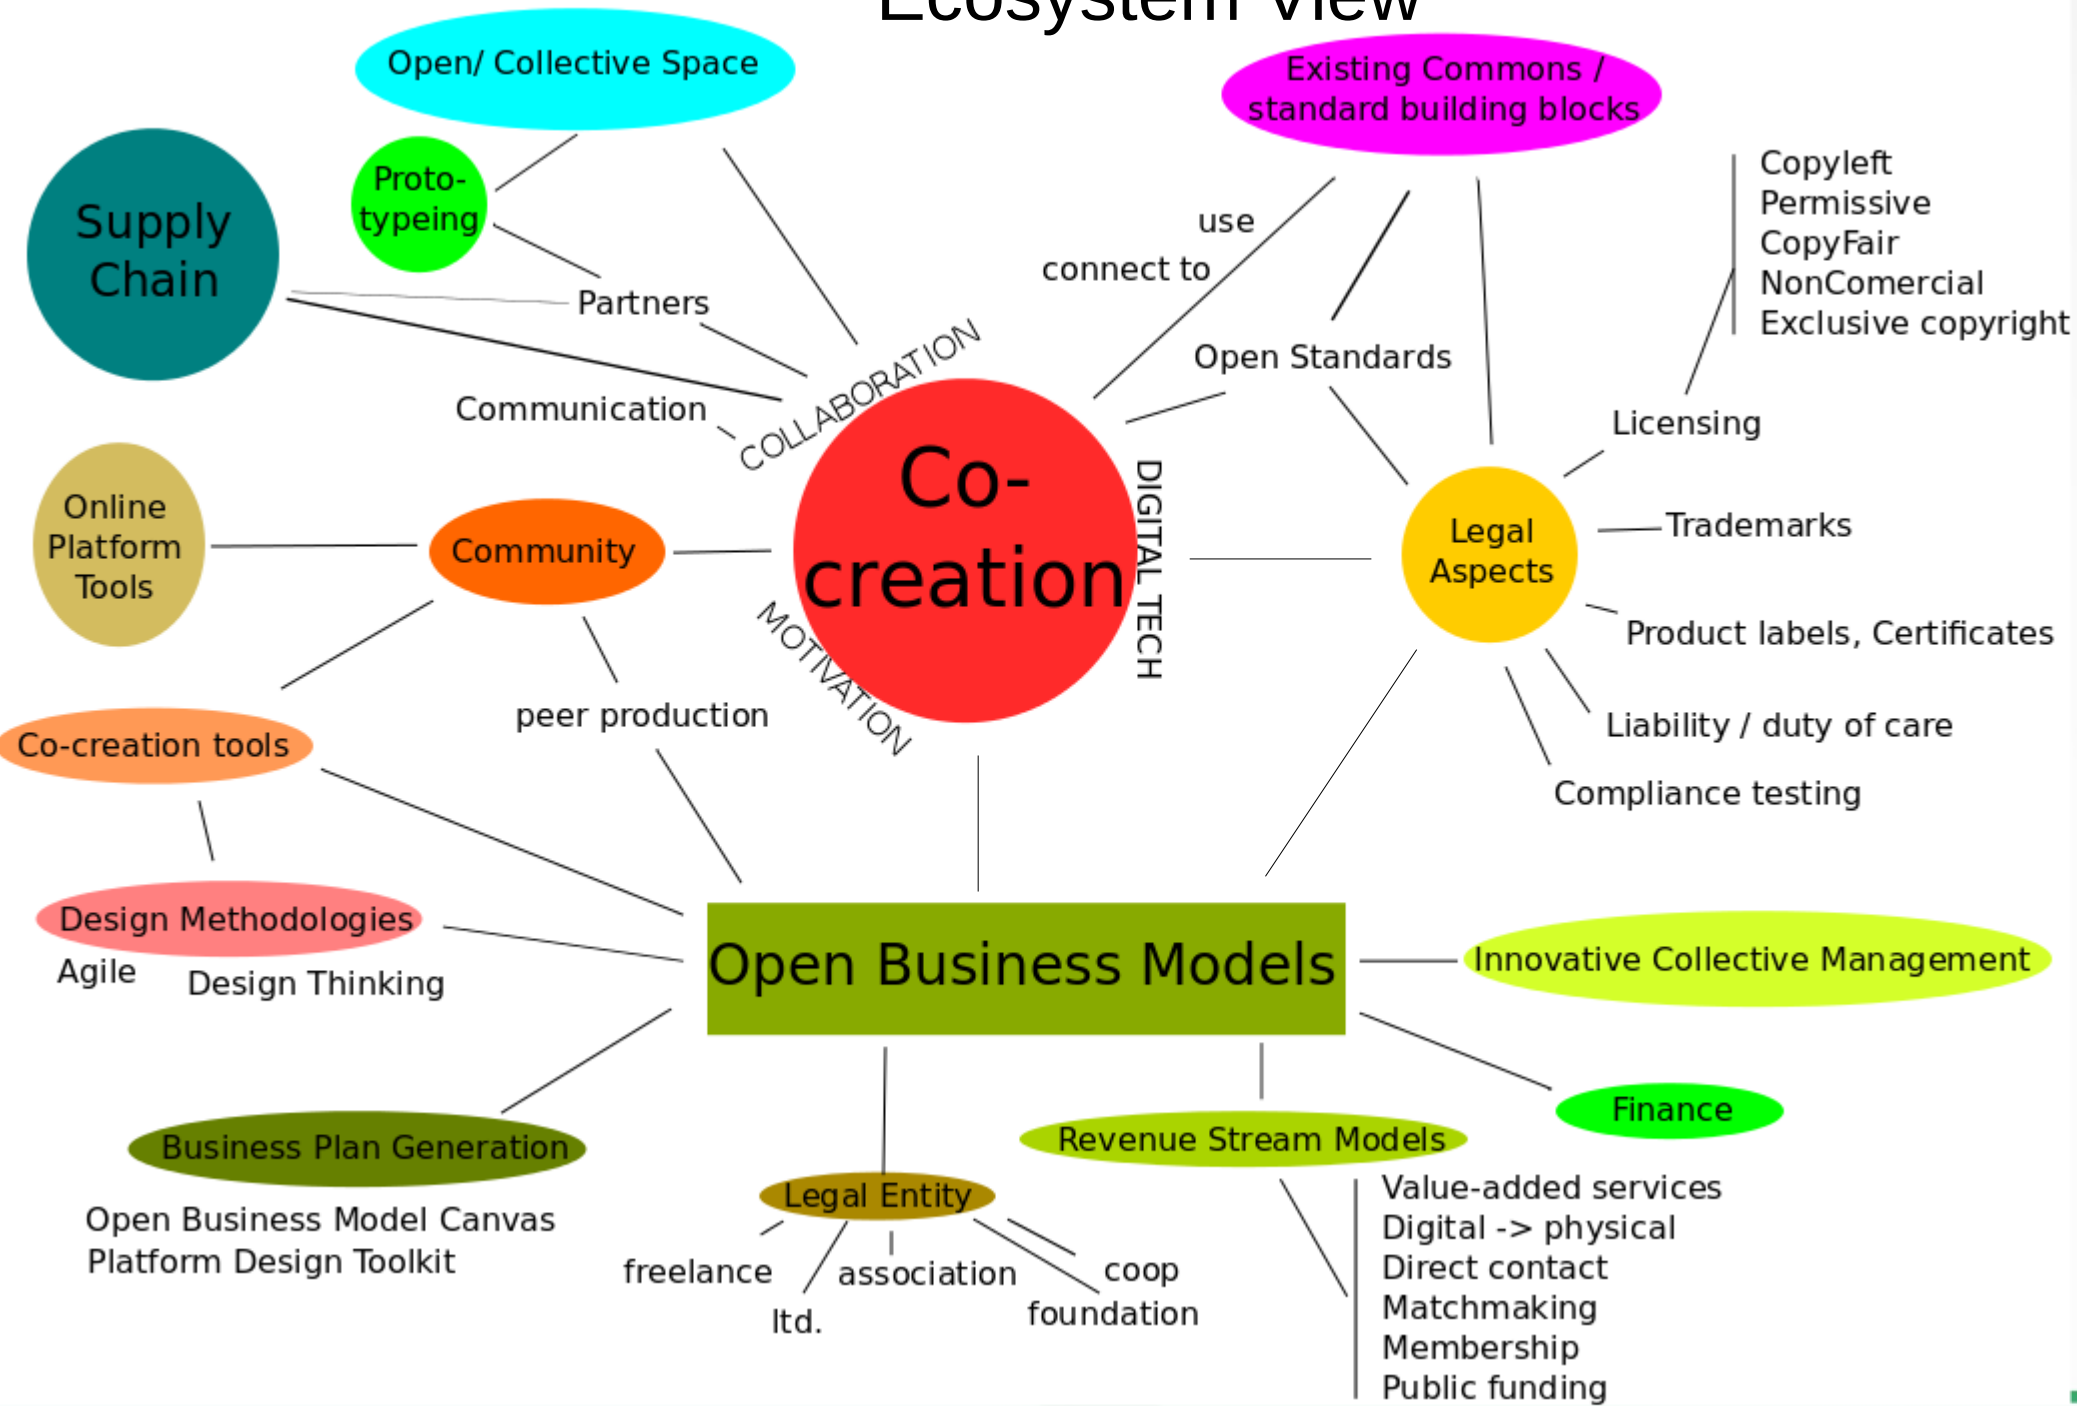

Innovative collective mgt. models

- **Sensorica** - revenue distribution over contributors to R&D sensor community
- **Enspiral** - commons oriented business network
- **Cooperativa** Integral Catalana
- **Calidoscoop** / Economic Activity Cooperative
- **Guifi.net** – cost compensation
